Use-Case Specification: Approve posts

1. Approve posts

1.1 Brief Description

This use-case helps admin to select the posts that are suitable for the application

2. Flow of Events

2.1 Basic Flow

1. Member post new content to the app
2. System checks content of the post
3. System approves the post

2.2 Alternative Flows

In step 2, if the member's post is found to be invalid, the system will not approve that post and send a notification to the member

3. Special Requirements

Notifications must be sent to member in a maximum of 1 minute

4. Preconditions

None

5. Postconditions

The post will be uploaded to the app, users can view and members can interact with it

6. Extension Points

None
