# Use-Case Specification: Ban member

## 1. Ban member

### 1.1 Brief Description

This use-case helps admin manage members through function such as banning members or awarding members with active contributions

## 2. Flow of Events

### 2.1 Basic Flow

1. Member violates the rules of the application
2. System sends an alert to member
3. Member still intentionally violates
4. System implements banning member

### 2.2 Alternative Flows

- In step 3, if member knows it's wrong and doesn't violate anymore, the system will save the violation history and ignore this time
- In step 2, if it is deemed that a member's violation is too serious, the system will not send a warning but directly ban that member

## 3. Special Requirements

Warning must be sent as soon as a member is found to be in violation

## 4. Preconditions

Admin needs to login with admin account

## 5. Postconditions

Violating members are banned

## 6. Extension Points

None
